

BOOTH DISPLAY REGULATIONS

Exhibit Stand Rules/Specifications:

Remember to check all of the fine print for lighting restrictions, flooring requirements, and set up regulations.

Including but not limited to:

- Target move-in schedule
- Marshalling yard and POV (personally-operated vehicle)
- Access for those exhibitors setting up their own stands
- Set-up times
- Advance shipping vs shipping to show site
- Material handling
- Exclusive service providers

Please review the following visuals and read in detail the stand rules located in our Exhibitor Service Kit.

Inline Stands - Shell Scheme Space

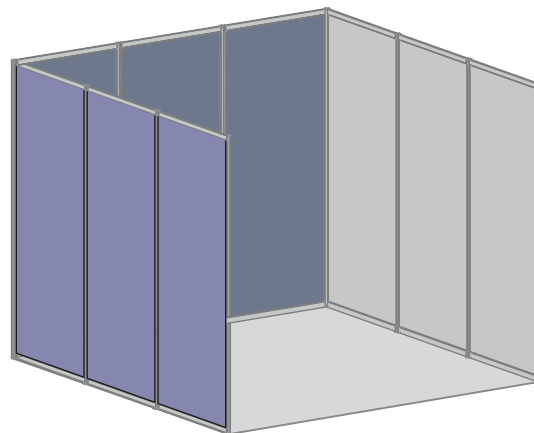

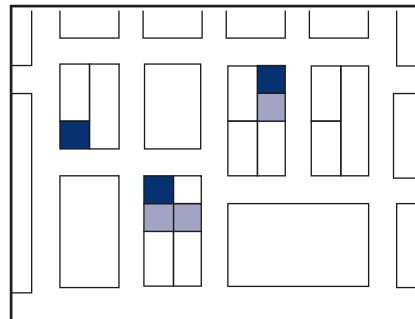

Shell scheme inline stands contain one or more 3m-by-3m units in a straight line with stands on either side and/or behind its back wall.

- Solid white back wall and side wall panels, 2.5 m (8 ft.) high
- White metal crossbars to affix fascia name board and/or spotlights (*when purchased separately by exhibitor)
- Exhibitors are required to provide flooring for the entirety of their stand space.
- No hanging signs are permitted. All stand elements must be ground supported.
- Stand drawings do not need to be reviewed by show management.

Inline Stands – Raw Space

Inline raw space exhibits are perfect for exhibitors who are building custom stands and have their own wall structures. Inline raw space is defined as a narrow booth space comprised of one or more 3m-by-3m units in a straight line.

- Inline raw exhibit spaces do not have shell-scheme hard walls
- Inline raw exhibit spaces may not have hanging signs, lighting trusses, materials or components above stand spaces.
- All ground-supported exhibit materials, components and identification signs will be permitted to a maximum height of 2.5m (8 ft.)
- A back wall that adjoins another exhibitor must be finished
- No identification of any kind is allowed on a back wall that adjoins another exhibitor. This includes company logos.
- Exhibitors are required to provide flooring for the entirety of their booth space
- Stand drawings must be submitted and approved by show management.

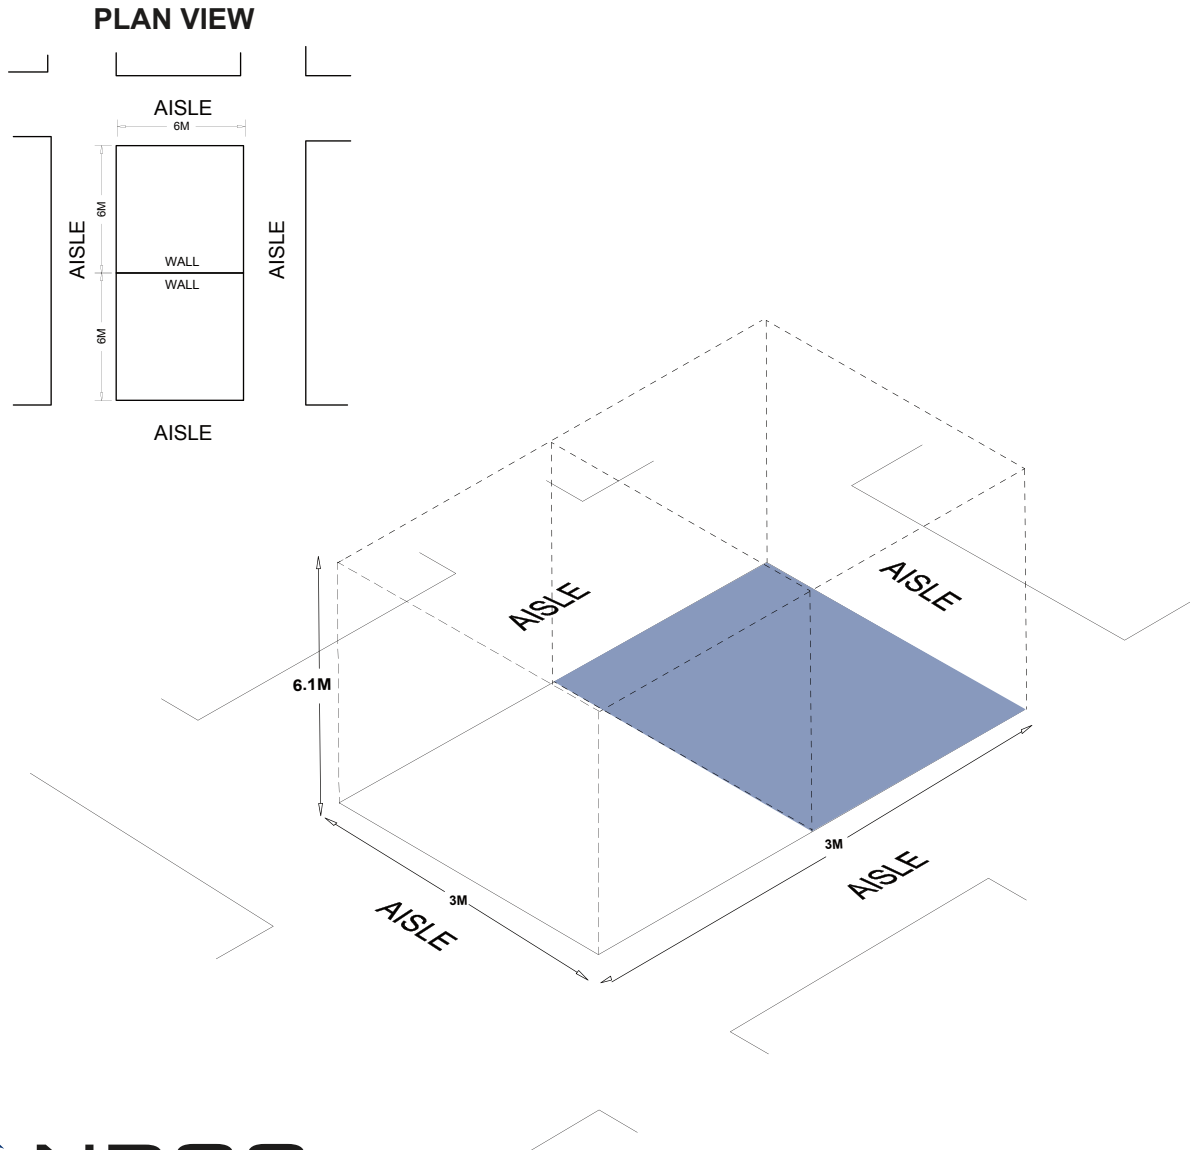

PLAN VIEW

Non-perimeter Peninsula Stands

A non-perimeter peninsula stand is a stand that is a minimum of a 6m-by-6m and is positioned back to back with an adjacent exhibitor.

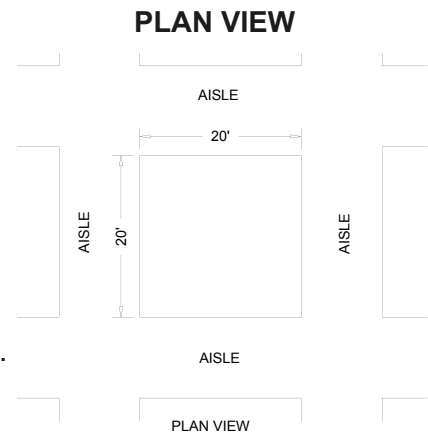

- Maximum height = 6.1m (20 ft.)
- Hanging signs are NOT permitted with the exception of lighting truss.
- Stand build may only include 50% or less hard walls.
NOTE: Glass counts as a hard wall
- Stand drawings must be submitted and approved by show management.

Non-Perimeter Island Booth

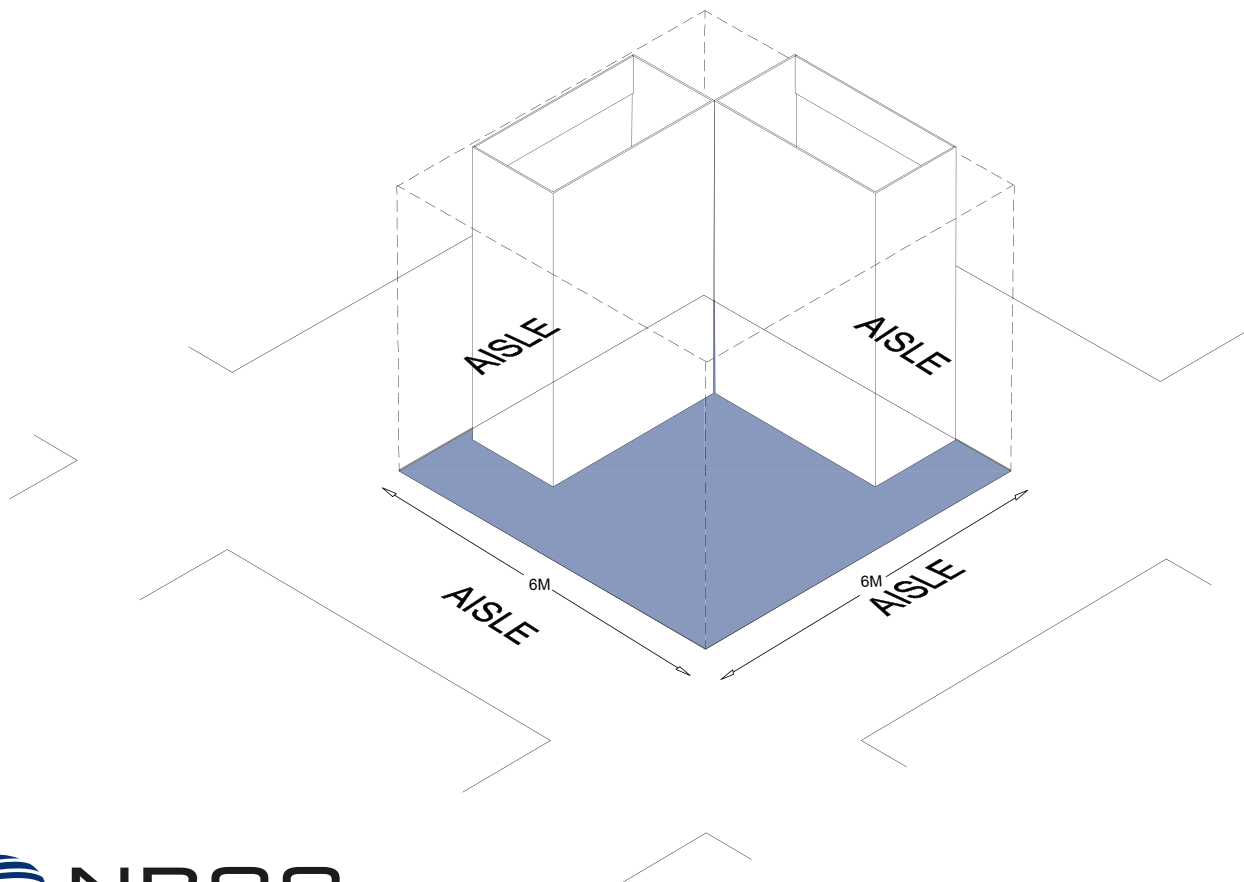

A booth that is surrounded by aisles on all four sides.

- Maximum height restrictions:
180 sqm and over = 4.6m (15 ft.)
Less than 180 sqm = 6.1m (20 ft.)
- Hanging signs are **NOT** permitted
- 50% or less hard walls regardless of size.
NOTE: Glass counts as a hard wall.
- Stand drawings must be approved by show management.

Lighting trusses are allowed provided they do not exceed 9.1m (30 ft.) in height.

- Lights must be directed to the interior boundaries of the booth space
- Bulbs: Halogen, LED
- Lamps: strobe, gobo flashing, rotating, and other lighting effects must not interfere with neighboring booths.

Perimeter Island Stand

A perimeter island stand is located around the perimeter of the exhibit hall.

- Maximum height = 9.1m (30 ft.)
- NOTE: Multilevel or Covered stands often require additional approvals from the Convention Center and/or Fire Marshal
- Only perimeter stand locations are allowed to rig/hang signs from the ceiling
(These locations are highlighted in GREEN on floor plan)
- Back walls and side walls that are visible to neighboring exhibitors must be finished
- Stand drawings must be approved by show management.
