

REMINDER TO THE EXHIBITORS

EBACE2017 WIFI NETWORK

To ensure optimal operation of this network, exhibitors are reminded that they have to comply with the specific rules governing WiFi use at Palexpo*.

Palexpo SA is using and offering 802.11 ac/gn WiFi technology for its Internet site. Frequency bands **2.4 GHz & 5 GHz are reserved exclusively** for the use of the Palexpo WiFi infrastructure.

To prevent interference problems compromising the quality of connexions, **the exhibitors are no longer permitted to install their own WiFi router**, nor any other solution/devices using 2.4 / 5 GHz frequencies (light control, ad hoc connexions, etc.). Palexpo is thus your exclusive provider for the latest wireless services.

Non-compliance with the current WiFi Regulations

Any WiFi equipment not complying with these terms and disrupting the **EBACE2017** WiFi service will have to be turned off at the request of Palexpo SA and the exhibitor will be reported to the Organisers.

Thank you for cooperation in this matter !
