

Geneva, November 2017

Dear Exhibitor,

We hereby remind you of the regulations in force at Palexpo:

**Catering:**

Palexpo has its own catering service on site, **Palexpo Restaurants**, completed by official partners. To ensure a quality service and simplified logistics, only Palexpo Restaurants and the official catering partners are entitled to work on site.

For more info on Palexpo Restaurants, please click [here](#)

For more info on the Palexpo catering partners, please click [here](#)

**Foreign staff employed at Palexpo:**

If your company is hiring foreign staff, please ensure that the regulations concerning foreign staff are enforced. You will find these in the "[General Regulations for the Users of the Palexpo Site, Administrative & Legal Regulations, Art. 16.](#)"

Please note that since 2015, the procedure to register foreign staff has changed: applications must now be submitted online.

You will find more information under this [link](#)

**WiFi – regulations:**

To ensure a better service, the Palexpo WiFi network alone is authorized in the halls. Further to interference problems that often compromised the quality of connexions, the exhibitors are no longer allowed to install their own WiFi router, nor any other solution using 2.4 / 5 GHz frequencies (light control, ad hoc connexions, etc.).

The Palexpo technical department is at your disposal to answer all your questions pertaining to this issue and to propose various solutions.

From now on, Palexpo is your exclusive provider for the latest wireless services. In our on-line shop you will find some new items which will meet all your WiFi requirements.

Please do not hesitate to contact the Palexpo teams for any further information.  
We thank you in advance for your cooperation.

**Palexpo SA**
